# The Future of Diabetes Care is here

Peace of mind for  
parents, freedom  
for kids.

## Care that keeps up—without the constant micromanagement.

The iLet Bionic Pancreas is the only system that learns and grows with your child—because life never stands still.

- **It does all the hard math**—so you and your child don't have to worry.
- **No carb counting, ever**—just a simple tap of "Usual for me," "More," or "Less" at mealtime.
- **It learns their body and keeps up** as they grow and change.
- **100% automated insulin dosing**—checks in every few minutes to help keep them in range.

# Designed for their long-term health and your peace of mind.

When it comes to choosing diabetes care for your child, it's natural to think about how a device looks or feels. But what truly matters is how well it adapts, protects, and supports your child's whole health—both body and mind.

### Why families choose the iLet:

Simple mealtimes with no carb counting.\*

Stays in automation—no disruptions or "kick-outs."

Personalized care in real time—constantly adapting to your child's changing needs.

Proven peace of mind—reduced stress and anxiety for parents and caregivers.<sup>1</sup>

Great results with less work—so kids can just be kids.

Connects with Dexcom CGMs or the FreeStyle Libre 3 Plus sensor.

# Stay close, no matter how far they go.

# The support you've been dreaming of.

Whether it's you, a grandparent, or the school nurse, everyone who cares for your child can stay informed and supportive.

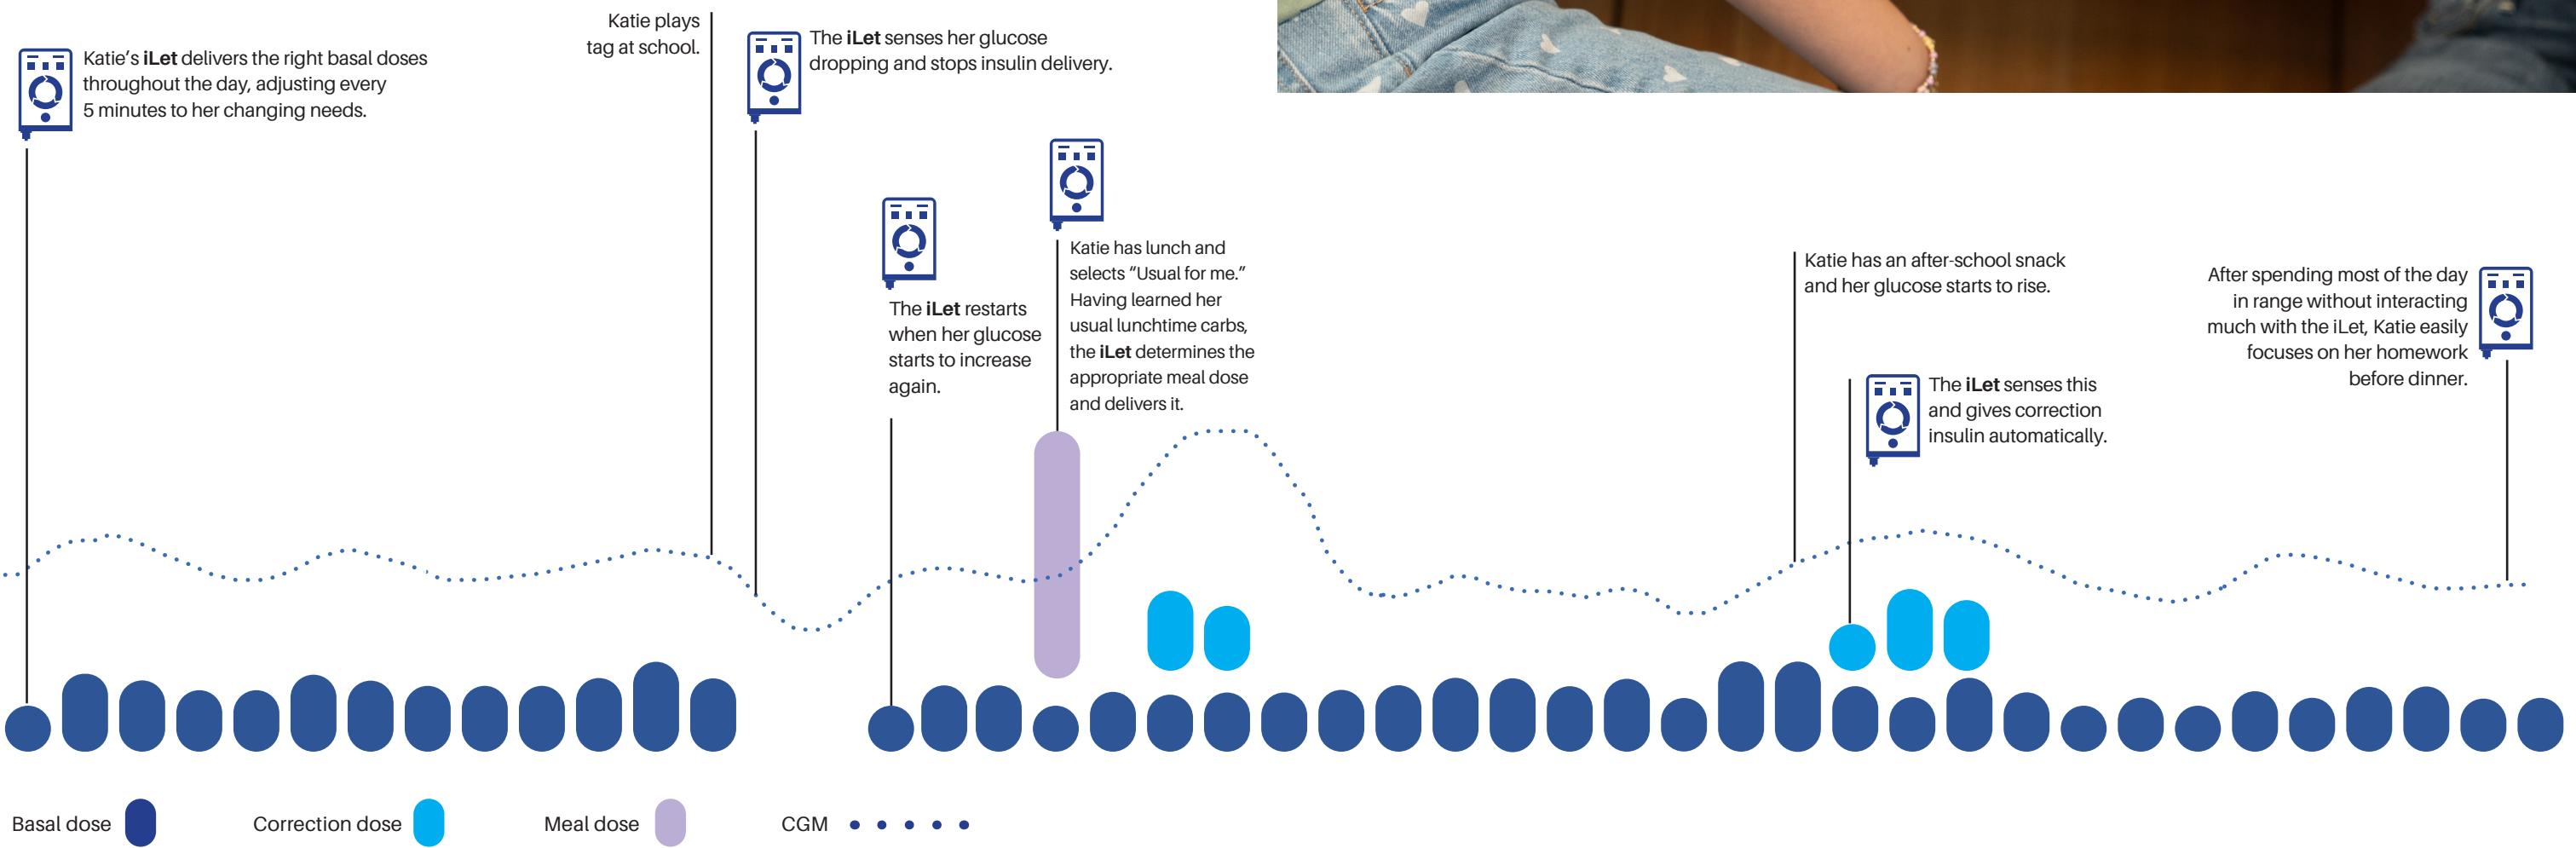

With the **Bionic Circle App**, you can see insulin being delivered in real time—helping you feel connected and reassured, even when you're apart.

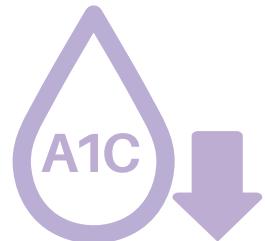

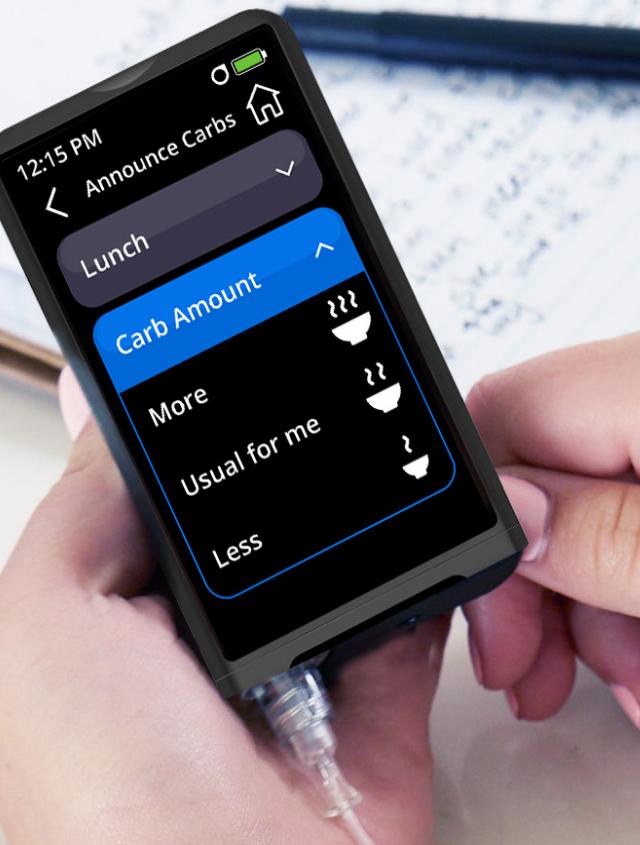

# The iLet has them covered.

The iLet makes 100% of the insulin dosing decisions, so they don't have to.

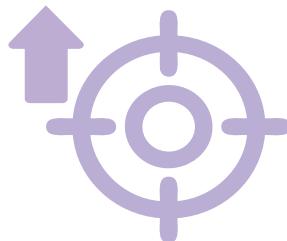

## Life with the iLet Bionic Pancreas

# Results you can trust, peace of mind you can feel.

Shown to significantly lower A1c.<sup>2</sup>

Shown to significantly increase time in range.<sup>2</sup>

## Achieved great outcomes with:

✓ No impact to hypoglycemia<sup>2</sup>

✓ Fewer device interactions<sup>3</sup>

Caregivers reported more **peace of mind** and **fewer worries** about blood glucose levels.<sup>1</sup>

## Real families. Real results. Real relief.

Great results with less work, so kids can focus on being kids.

“ I’m always on the go, so it’s awesome not having to worry about counting carbs.\* The iLet figured me out in only a few days and honestly just takes care of me now. My A1C’s 5.7 and I hardly do anything.

- Cruz, 16

“ It feels like the iLet is part of me. I like how it takes care of me and my brother, kind of like a pancreas.

- Lavonte, 10 (Older Brother)

“ I like that it doesn’t just stop in the middle of the day after 3 days, like my patch pump sometimes did.

- Amaris, 7 (Younger Brother)

“ Choosing a tubeless pump for our daughter seemed obvious, until we found the iLet. With it, Piper has her life back. She now has the freedom and independence to be a kid again. And as for her parents, it’s given us peace. My kid is safe and healthy. That is everything.

- Faith, Mom of Piper, 10

Individual results may vary. \* User must be carb aware.

# Great access. Low cost.

Whether you obtain your child's iLet through pharmacy benefits or medical benefits, we'll work hard to find the easiest access with the lowest cost.

## Why families choose **pharmacy benefits**:

### **Very low cost**

Most families pay \$0 for the iLet and \$25/month or less for supplies.

### **Faster access, fewer hurdles**

Skip the wait, get your child started on iLet more quickly.

### **No 4-year commitment**

Your family can switch today, even if under warranty with another pump.

**Peace  
of mind  
shouldn't  
come with a  
high price tag.**

### Safety Information

**RX ONLY.** The iLet Bionic Pancreas System is indicated for use by people with type 1 diabetes 6 years of age and older. The iLet Bionic Pancreas System is not indicated for use in pregnant women, people on dialysis, or critically ill patients. Do not use the iLet Bionic Pancreas System if using hydroxyurea. Users must test blood glucose levels when input from the iCGM is not available; be carb aware; maintain sufficient diabetes self-care skills; and have adequate vision and/or hearing to recognize all functions of the pump, including alerts, alarms, and reminders. Remove the iLet before MRI, CT, or diathermy treatment. Refer to the iLet User Guide for complete safety information at [www.betabionics.com/resources/safety](http://www.betabionics.com/resources/safety).
